

AI System/Web Developer

Innovative and results-driven AI System & Web Developer with 5+ years of experience designing intelligent systems and scalable web applications. Proven expertise in Python, JavaScript, machine learning, RESTful APIs, and cloud services. Passionate about building automated platforms that integrate deep learning, real-time data processing, and modern UI/UX principles.

Quan Doan.

Address:
Thon Quang Tien, Tho Vinh, Kim
Dong, Vietnam

Skill Highlights

- Languages: Python, JavaScript, SQL, C++
- Web: React, Flask, Django, Wordpress
- AI/ML: TensorFlow, Pytorch, Scikit-learn, OpenCV, Transformers
- Data: Pandas, Numpy, PostgreSQL, MongoDB
- DevOps/Infra: Docker, Kubernetes, AWS, Github
- Tools: VS Code, Jupyter, Figma, NeoLoad, LoadRunner, OpenAI API

Languages

English (Fluent)
Vietnamese (Professional)

Experience

03/2019 to 3/2025

AI System Engineer - ContextOps AI(Freelance)-2024 Present

- Developed an AI-powered local-first system that links tasks to human context using vector search(FAISS), calendar/email parsing, and LLMs.
- Integrated Obsidian with Mistral-based local RAG pipeline to automate task suggestion and prioritization.

Full Stack Web Developer - MISA JSC, Vietnam-2023~2024

- Built framework, create logical process and optimization for key features such as printing, importing, exporting services.
- Integrated Vertex AI and Gemini to improve model classification performance by 27%.

Machine Learning Engineer – AI Vision System Inc-2019~2024

- Created gesture recognition models to detect theft/suspicious behavior from video feeds with 95% accuracy.
- Deployed models using ONNX and NVIDIA TensorRT for real-time edge performance

Education

2015-2019

Bachelor of Science in Computer Science- Hanoi university of Science and Technology (HUST)

Certifications

AWS Certified Developer - Associate

Tensorflow Developer Certificate.

OpenAI API Mastery(Independent)

APP Development Soft: Java, JavaScript, C++, Matlab, Python
