WORK EXPERIENCE

Jan 2019 ~ Feb 2022, MISA JSC

Software Engineer

Main responsibilities:

- Worked as a productive and positive team member to design, code, test, report, and debug operations.
- Managed and Develop front-end and back-end development in the company's Product systems.
- Successfully identified, diagnosed, and fixed website problems, including broken links, typographical errors, and formatting issues.
- Develop and optimize desktop applications such as tools and workers for specialized functions including database conversion, database synchronization, and so on.
- Worked to assess competing websites in regard to content, look, and feel.
- Evaluated and became knowledgeable in new standards, technologies, and trends in website development.
- Providing mentorship to new software engineers.
- Contributing to software design and documentation.
- Providing agile estimation of development effort and input into project timelines

Techstacks:

- .NET Core, VueJS, ReactJS, PostgreSQL, SQL Server, Stimulsoft, WPF, Python

Feb 2022 ~ Dec 2022, SAFIN JSC

Software Engineer

Main responsibilities:

- Working closely with other members of the development team through the full systems lifecycle including requirements capture, design, development, testing, and deployment of APIs.
- Fixing bugs from existing websites and implementing enhancements that improved web functionality and speed.
- Written client validations and asynchronous importing views for showing popups on the site
- Create database procedures and functions and optimize existing queries.
- Analyze and design authentication flow in the current system then implement it over the backend gateway.
- Handle transaction requests from the internal admin portal with an optimized solution.
- Design, implement, and optimize price mechanisms to work more efficiently and reliably.

Techstacks:

- .NET Core, VueJS, OracleSQL, Keycloak, AWS

Dec 2022 ~ Apr 2025, NTQ SOLUTION JSC

Full-stack developer & Technical Leader

Main responsibilities:

- Research, analyze, and find solutions for addressing security vulnerabilities in insurance systems based on reports from KPMG, Veracode, and Synopsys.
- Migrate legacy ASP.NET web systems to the Azure Cloud environment.
- Take responsibility for deploying and resolving issues during the migration process.
- Work directly with customers on daily meetings, addressing issues and providing technical solutions.
- Elevated legacy systems to advanced versions for enhanced performance.
- Diligently upheld and troubleshooted existing systems, resolving complex issues.
- Analyzed both functional and non-functional challenges, offering innovative technical architectures and solutions.
- Produced comprehensive diagrams and technical documentation for effective team communication.
- Collaborated with fellow developers by reviewing and providing constructive comments, fostering a collective approach to achieving success.
- Spearheaded a successful project, garnering high client appreciation through effective team leadership.

Techstacks: - .NET Core, .NET Framework, Security, Kafka, SQL Server, Azure

Apr 2025 ~ Present, FPT Software

Full-stack developer & Project Manager

Main responsibilities:

- Team Leadership and Development: Recruiting, training, and mentoring team members to foster a productive and cohesive work environment.
- Strategic Planning: Setting goals, defining strategies, and aligning team efforts with the startup's vision and objectives.
- Project Management: Overseeing project timelines, resource allocation, and ensuring successful project completion within budget and scope.
- Communication: Facilitating clear and effective communication within the team and with stakeholders, including investors and customers.
- Problem-Solving: Addressing and resolving technical and operational challenges to maintain workflow and product quality.
- Financial Management: Monitoring budgets, expenses, and financial performance to ensure sustainable growth and profitability.
- Innovation and Product Development: Driving the development and enhancement of products or services to stay competitive and meet market demands.

Techstacks:

- Python, Golang, SolidJS, MySQL, Kafka, K8s

EDUCATION

Sep 2016 ~ Oct 2020, HANOI UNIVERSITY OF INDUSTRY

Major: Software Engineering

Degree classification: **Good**

Bachelor in Software Engineering

CERTIFICATIONS

2018,

Responsive Web Design Certification

JavaScript Algorithms and Data Structures Certification

Front End Libraries Certification at FreeCodeCamp
